

# LAND-LEBEN, regionality counts before internationality

Combining regionality, trust and relationships. We remain independent of the global commodity exchanges. After all, healthy soil, a local climate and fairness in the supply chain have a major impact on quality. As a consumer, you rightly expect first-class food. We do our best to fulfil this. As a good brand, we stand behind our products 100%. Because we are convinced: you can taste regionality! When you know the story and the company behind the meal, every one of them becomes a journey of pleasure.

## Natural raw materials

We love our raw materials and treat them with respect. We keep transport routes as short as possible and structures small. Our foods remain natural without preservatives, flavour enhancers or colour additives. After all, the quality of the product is decided long before it is refined. Because only when good things come in, can good things come out.

## **Strong and reliable family business**

We are proud to be a responsible employer that can offer its satisfied employees optimal conditions. As a family business, we are committed to an open and collegial working atmosphere every day, because we can only remain successful in the long term if we work together.

But we also feel responsible towards our consumers. For us, being a good brand means that value creation from a region stays in the region as far as possible. If the suppliers are located locally, there are also only short transport routes. This benefits both the environment and quality. The closed value chain also ensures the naturalness of our food.

Good brand, good food!

**Do something good for yourself: because naturally it tastes like homemade!**
